ROBODIES® - REMOTE ROBOTIC BODIES THE NEXT STEP IN TELECOMMUNICATION

Every new telecommunication technology fundamentally improved our lives. It's time to introduce the next one: **Robodies**.

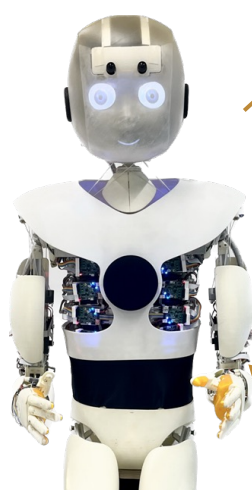

TECHNOLOGY: ROBODIES®

Robodies are **real physical avatars** for people to act in a remote location.

Robodies allow to teleport your **physical presence** to a remote location.

Now you can see, hear, talk, interact and even dance remotely, as if you were physically there.

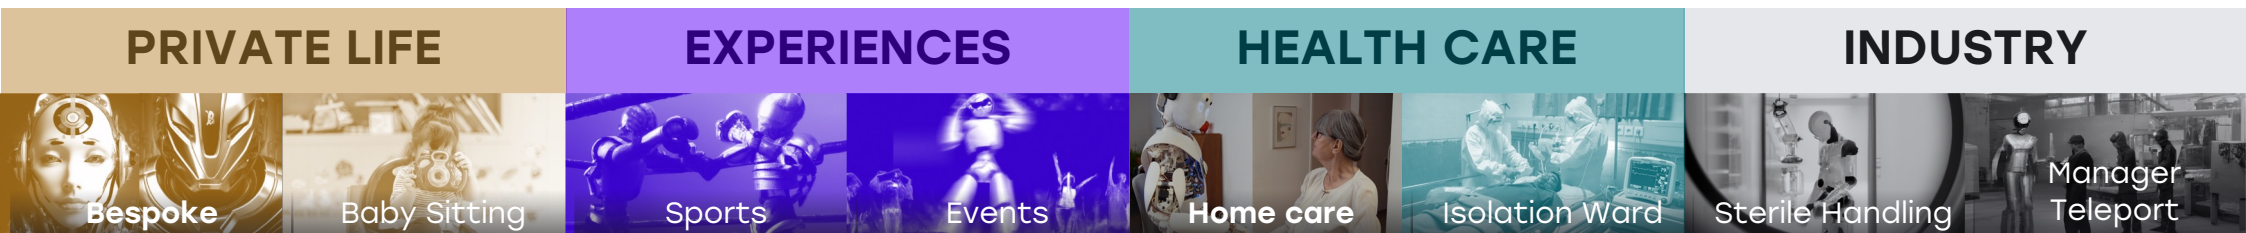

**ROBODY:
A REAL
AVATAR**

**SEE
HEAR
TALK
TOUCH
DANCE**

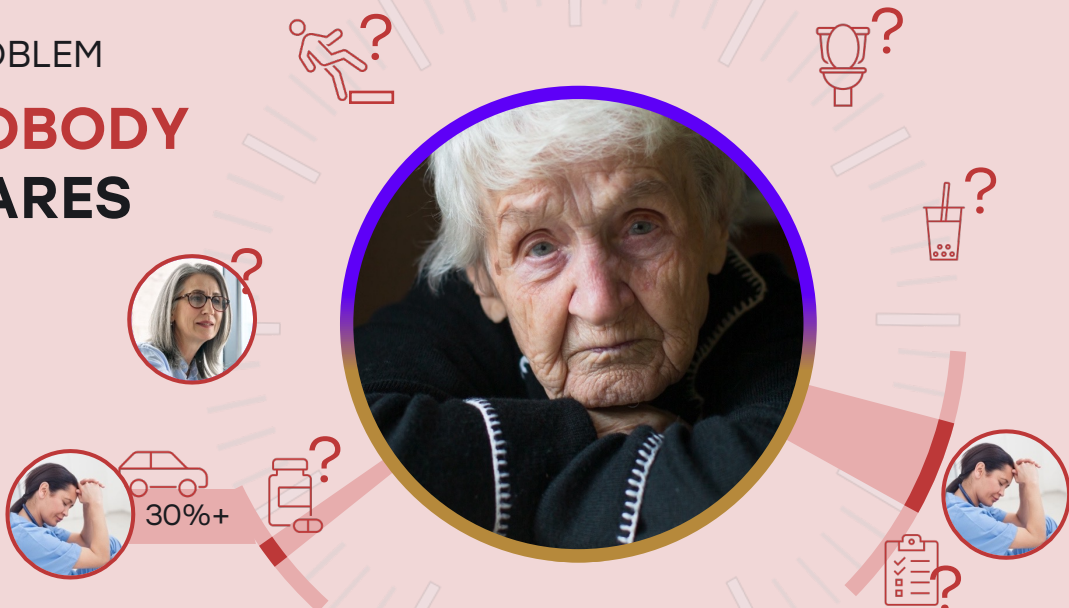

PLATFORM & USE CASES: SOLVING THE CARE CRISIS

Robodies are a broadly useful platform technology. After analysing the use cases, we've converged to two synergetic cases that yield the most robust and promising exponential strategy.

PROBLEM

NOBODY CARES

24/7h Care Crisis

Accidents, and no one notices
Help not available when needed
Hospitalization due to dehydration
Docu frenzy & driving stresses caregivers
Pills are wrongly taken
Elderlies are lonely & family feels guilty

SOLUTION

ROBODY CARES

24/7h Care Service

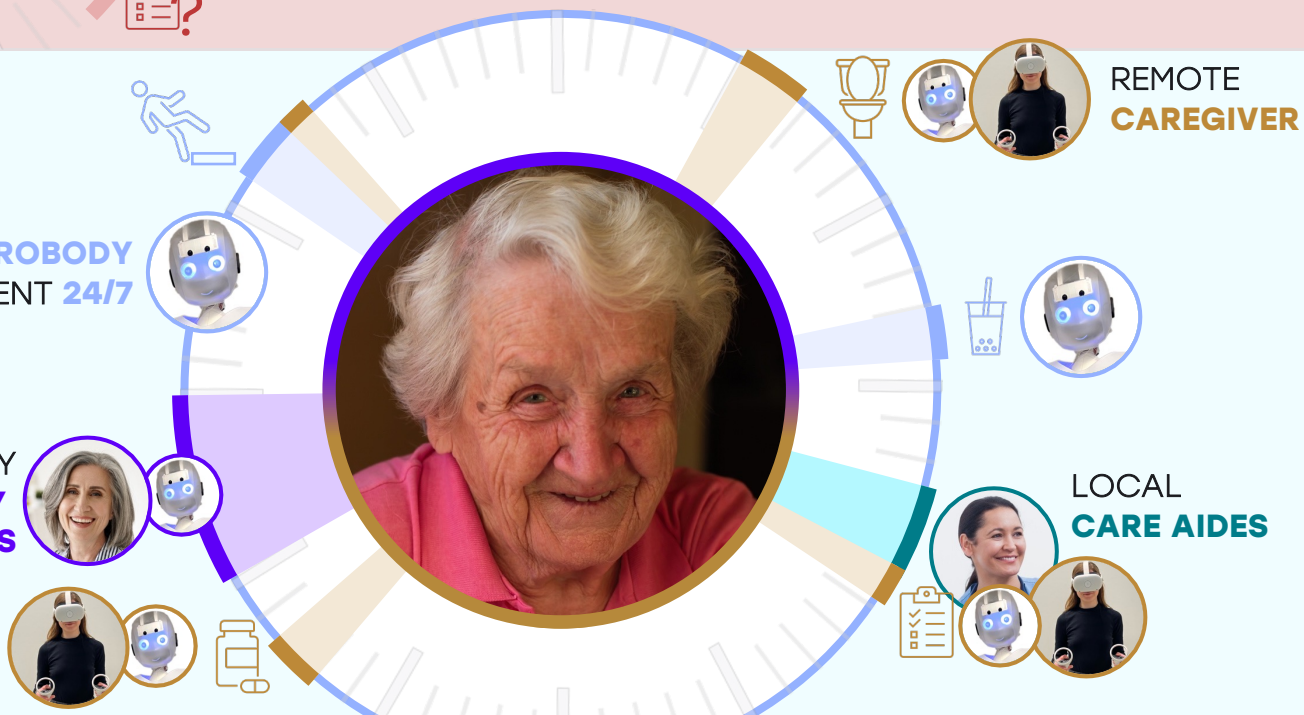

- AI emergency alarm
- Immediate support on call
- AI vitals monitoring
- Caregiver support
- Remote pill administration
- Family visits from everywhere

**ROBODY
PRESENT 24/7**

**EASY
FAMILY
ACCESS**

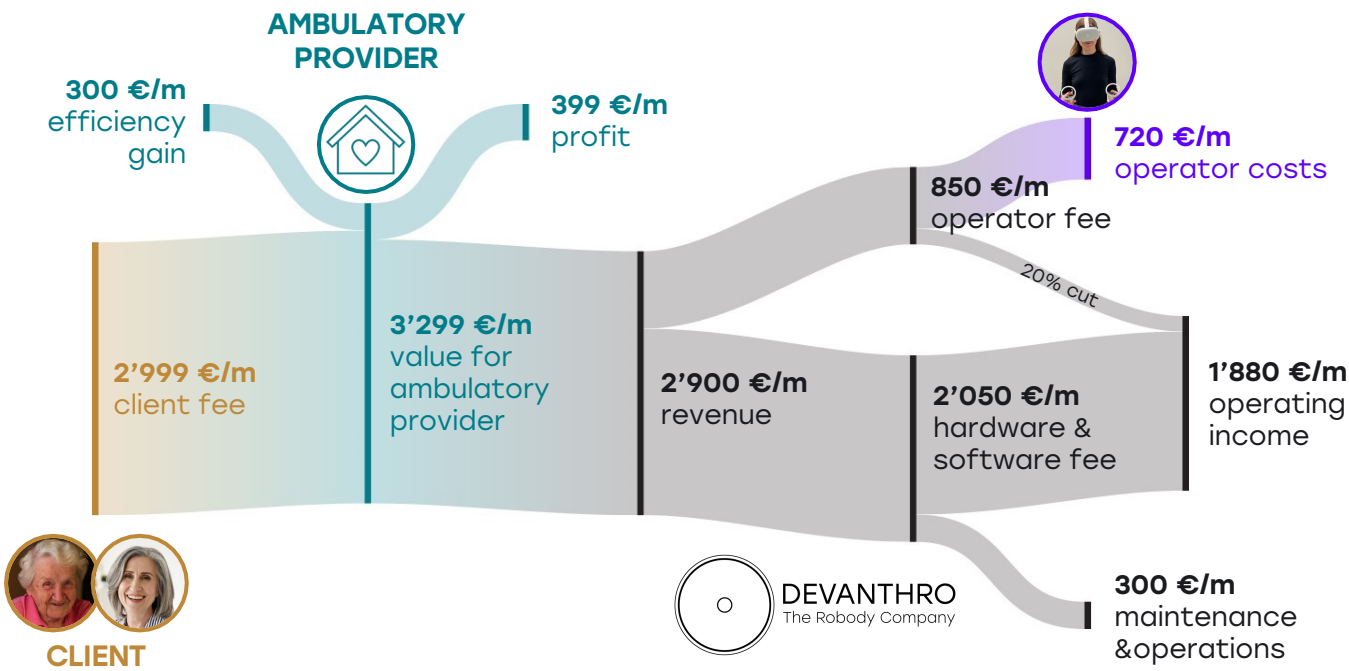

**REMOTE
CAREGIVER**

**LOCAL
CARE AIDES**

BUSINESS MODEL

Robody Cares as a RaaS (robot-as-a-service) model as a better alternative to live-in caregivers

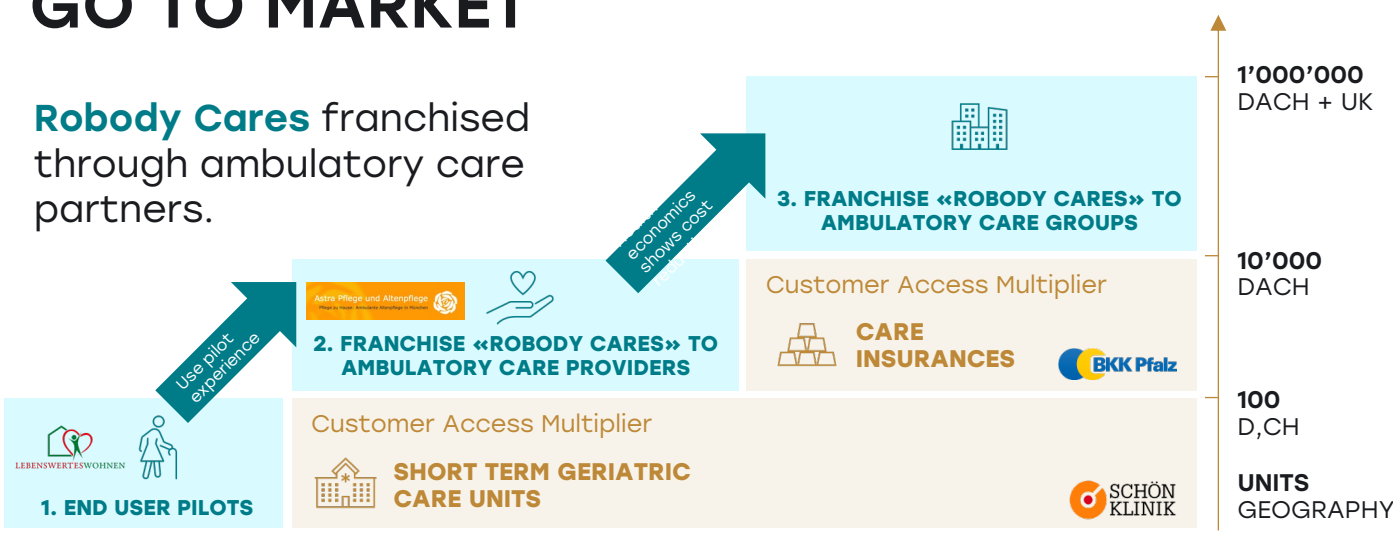

€ 18'000
Robody production & setup costs

9.6 months
to break even on production costs

€ 21'000
annual gross margin/household

GO TO MARKET

Robody Cares franchised through ambulatory care partners.

INVESTMENT OPPORTUNITY
PRE-SEED ROUND

- ✓ 5 Robody proof of concepts
- ✓ Pilots running in 5 homes
- ✓ Strategic partnerships established

TEAM SUCCESSES & TRACTION

We've been bootstrapping to build the basic proof of concept technology, always directly working with customers

- 6 robots sold to:** UNIVERSITY OF OXFORD, 香港中文大學 (深圳) The Chinese University of Hong Kong, Shenzhen, KTH
- 14 PoCs paid by corporates:** Infineon, maxon, etisalat, Sunrise, upc, AUTODESK.
- 8 years of research & robotics:** Fraunhofer Human Brain Project, TUM, CHARITÉ, Universität Zürich
- 3 complete humanoids**
- 25'000+ public interactions**

We've connected >300 lay operators to >1500 people via our working proof of concept robody.
